

SARRA OULAD BEN HAMDI

PROFILE

Junior PHP Developer with hands-on experience building web applications using modern PHP (Laravel), MVC architecture, and RESTful APIs. Experienced in developing backend features, supporting existing projects, and collaborating within Agile teams. Strong understanding of object-oriented programming, clean code practices, and version control with Git. Motivated to grow within a collaborative development environment and contribute to well-structured, scalable solutions.

EXPERIENCE

NTT DATA – Tetouan, Morocco | May - July 2025

- Performed functional and integration testing on enterprise applications built with Spring Boot and Angular
- Validated REST APIs and verified data consistency between front-end and back-end systems
- Executed tests in Linux environments and used command-line tools to analyze logs and system behaviour
- Wrote basic Python scripts to assist in validating API responses and test data
- Applied the same MVC, REST API, and clean architecture principles across different backend technologies, including PHP/Laravel in personal and academic projects
- Collaborated closely with developers and QA members during sprint testing and bug fixing
- Participated in Agile ceremonies, including sprint reviews and retrospectives, contributing to continuous improvement

PROJECTS

StayFind — Student Accommodation Platform

- Executed functional testing of authentication, listing, booking, and
- Designed and developed a Laravel-based backend using MVC architecture
- Built JSON RESTful APIs for listings, users, reservations, and messaging
- Implemented authentication and role-based access
- Maintained clean, scalable, and well-structured PHP code

Stock Management System — Laravel Application

- Designed and executed test cases for CRUD operations and Excel import/export features
- Verified multilingual functionality and data integrity
- Performed manual regression testing after system updates
- Technologies: Laravel 12, Blade, MySQL, Bootstrap, Tailwind CSS
- Developed backend features using modern PHP (Laravel 12) with CRUD operations, validation, and structured controllers/services

EDUCATION

- SPECIALISED TECHNICIAN DIPLOMA IN DIGITAL DEVELOPMENT**
OFPPPT (NATIONAL VOCATIONAL TRAINING INSTITUTE), MOROCCO
2023-2025
UK LEVEL 4 EQUIVALENT
- BACCALAUREATE IN PHYSICAL SCIENCES**
ABI BAKR SEDIK HIGH SCHOOL
2021-2022-MOROCCO

CONTACT

- +44 7503869474
- hamdisaraa004@gmail.com
- 47 MAGDALEN ROAD ,PORTSMOUTH
PO2 9HS

TECHNICAL SKILLS

- PHP 8+, Laravel (MVC)
- RESTful APIs (JSON)
- MySQL, SQL
- Object-Oriented Programming (OOP)
- Git, GitHub, Composer
- HTML5, CSS3, Bootstrap
- JavaScript, React.js (basic)
- Docker (basic)

SOFT SKILLS

- Strong analytical and problem-solving skills
- High attention to detail and quality focus
- Effective communication and teamwork
- Strong organisation and time management
- Adaptable and eager to learn new technologies

LANGUAGE

- English: Fluent
- French: Intermediate
- Arabic: Native
- German: Basic (A2)
- Spanish: Basic (A2)

INTERESTS

- Software testing and automation
- Technology in safety-critical systems
- Hiking and outdoor activities
